

RIPTIDE — Pocketful App Character Pack

Character reference, expressions, sprite usage, and in-app decision companion behavior

What this PDF contains

- The current visual identity for Riptide, including turnaround views, expressions, and core character proportions.
- A finance-app-ready sprite sheet for Pocketful, designed around balances, spending confidence, warnings, success states, and purchase friction.
- Suggested in-app behavior for Riptide as a decision companion who questions purchases only when user-defined rules or financial context warrant it.
- A compact prompt library and state map so product, design, and frontend can tie Riptide behavior to real account state rather than arbitrary UI decoration.

Core character role in Pocketful

- Riptide is not just branding; he is the app's visible spending conscience.
- He surfaces "Are you sure?" moments for online purchases, subscriptions, budget pressure, and goal conflict.
- He can be friendly, skeptical, smug, excited, or annoyed, but every prompt should be backed by an actual financial reason code.

Primary Character Reference

Master board with palette, turnaround, expressions, and key visual notes

Turnaround Views

Use these views to keep proportions, spikes, markings, and silhouette consistent.

Front

Back

Existing Expression & Pose Sheet

Original pose language for animation, reactions, and emotes

Pocketful Finance Sprite Sheet

App-specific stickers and finance reactions for balance, warning, success, and spending states

Pocketful State Mapping

Recommended product use for the new sprite sheet

Financial states → Riptide behavior

- HEALTHY / SAFE TO SPEND → smug or happy idle pose
- TRANSFER SUCCESS → celebrate / thumbs-up / send-complete pose
- TRANSFER PENDING → loading or focused phone pose
- BUDGET PRESSURE → skeptical, thinking, or concerned pose
- OVER BUDGET → warning sign or frustrated paper-storm pose
- GOAL ACHIEVED → victory-on-rock or cheering pose
- LOW ENERGY / NO ACTION NEEDED → relaxed mug pose or calm seated idle
- SUSPICIOUS PURCHASE / PURCHASE FRICTION → crouched skeptical pose before confirmation prompt

Suggested surfaces

- Home balance card
- Checkout confirmation overlay
- Budget tab
- Savings milestone celebration
- Transfer success/error toast
- Subscription reminders
- Developer test receipts and demo screens

Visual system references

Decision Companion Prompts

Example “Are you sure?” lines for online purchases and financially risky actions

Reason code

Sample Riptide prompt

BUDGET_PRESSURE

“You’ve got \$86 left in dining. This order is \$42. Still want it?”

SAFE_SPEND_DROP

“This drops your safe-to-spend below your comfort zone. Want to keep going?”

GOAL_CONFLICT

“You said the trip fund mattered more than takeout. Spend anyway?”

REPEAT_MERCHANT

“Same merchant again this week. We sure this one earns another swipe?”

UNUSUAL_AMOUNT

“This is higher than your usual order here. Still looks right?”

SUBSCRIPTION_RISK

“Another recurring charge? Want to double-check before it sticks around?”

LATE_NIGHT_SPEND

“Late-night online buy. Confidence level?”

NEAR_ZERO_BUFFER

“After this, there won’t be much cushion left. Continue?”

Implementation note

Riptide should only question purchases when a real reason code is present. His line, pose, and severity should be derived from actual financial state, not from arbitrary UI timing. That keeps him useful, testable, and trustworthy.
